

How to Hang Artwork

1. Measure and lightly mark 60" on the wall.
2. Measure artwork and divide by 2 (this gives you the center).
3. Measure top of your picture to the tightened wire (a small amount).
4. Subtract "tight wire" amount from 1/2 height amount for the "to the hook" amount. This will tell you how far above 60" your hook should go.
5. Lightly mark wall just above 60" with the "to the hook" amount.

Example:

1. Picture is 20" tall.
2. Middle is at 10" (this mid point should rest at 60").
3. Wire comes to 2" below the top.
4. $10" - 2" = 8"$
5. Lightly mark 8" above your first mark (in this case, 68") on the wall.

Though this process may seem complicated, it is actually quite simple to do. The thing to always remember is that the CENTER of all your pictures are hanging at the same 60" and you are just figuring out where the hook needs to go for each artwork piece.

This 60" also applies to groups of pictures. Think of a group as ONE picture. After you arrange how you want them all to hang (doing this on the floor makes it easier), start with the center picture/pictures and get them at 60" on center. Then surround them with the rest of the group.
